Dear Parents

Re: Maths in the EYFS parent workshop: Wednesday 2 March 2022

On **Wednesday 2 March 2022 at 2pm**, I will be running an Early Years maths workshop for parents that will explore how we teach Mathematics in Early Years, how you can support your child with their Maths learning at home and the importance of Mathematical language.

The workshop will explore the following areas:

- An insight into the revised Early Years Framework
- How mathematics is taught in the Early Years
- Resources that we use at school to support mathematical teaching and learning
- How to support your children at home with practical and real life opportunities in Maths
- The notion that all children can achieve in maths by promoting a growth mindset

Parents attending the workshop should drop their child off as usual and then make their way to the **round hall** (by the main entrance). Due to hall capacity, one adult per family can attend the workshop. If you would like to attend please indicate on ParentMail by 12.00 pm on Monday 28 February.

As parents will be in an enclosed space and coming into contact with people they don't normally meet, we are recommending that parents wear a face covering when in the round hall and ask that all visitors carry out a negative lateral flow test before attending.

Thank you for your continued support and I look forward to seeing you there

Best wishes

Olivia Penfold
